Product Information Sheet

Wand Switch, suits our mounting arms

PART No. WAS-1/4

PRICE AUD \$145.00

GST \$0.00

INQUIRY DATE 28 Mar 2024

The very tough Wand Switch has been on our list for years and is still one of the most adaptable switches we make. Deals well with 'gross' movements as the wand will bend but always bounce back to the same position - this switch can handle almost any treatment. The flexible arm which activates the switch from any angle can have many different ends sleeved onto it.

Mounting Arms, purchased separately

The wand Switch is designed to be used with one of our range of mounting arms, purchased separately. Shown here with the Light Articulated Switch Mount and also suits the Sturdy Flexible Switch Mount and the Boom Arm Stand
